**WORK WITH THE
SUN ON YOUR FACE.
THE FRAGRANCE
OF HERBS IN YOUR
NOSE. AT HOME.**

Working in your own garden

A pleasant workstation in your garden cabin - why not? Lasita Maja's garden cabins are perfect for this: high quality, modern and cosy at the same time. A range of accessories make sure that there is something suitable for everyone. The best thing is that your own home is not far away, yet there is enough distance between the two - both spatially and emotionally. So it's not hard to wind down in the evening. Just step outside the door, take a deep breath and enjoy the atmosphere of your garden.

Lasita Maja.

MORE THAN 20 YEARS OF QUALITY

EVERY GARDEN CABIN BEGINS WITH A DREAM.

It's your dream. At Lasita Maja, we bring it to life.

As an experienced manufacturer of high-quality log cabins, we produce children's playhouses, pavilions, garages and individual holiday homes, as well as classic garden cabins. To do this, we use the best wood and combine modern and gentle processing technology with traditional craftsmanship and secure packaging. We are well aware that high quality equals happy customers. And if there's one thing that matters most, it's getting the details right.

CERTIFIED WOOD

We use only select Nordic spruce for our garden cabins. Its flexible properties make it perfect for use as building and construction timber. Its slow growth in Europe's colder regions makes the wood particularly sturdy and solid.

In general, wood is a sustainable, renewable raw material. Since we value environmentally responsible timber management, all our products in this catalogue are FSC® Mix or PEFC certified.

FOLLOW US ON FACEBOOK.

Ask about FSC® certified products.

OUR RECIPE FOR SUCCESS: HIGH-QUALITY NORDIC RAW MATERIALS, STATE-OF-THE-ART PROCESSING AND DECADES OF EXPERIENCE.

To ensure that we deliver a unique product, we rely on long-standing employees with a great deal of experience and modern machinery. Trained eyes inspect and sort the materials and components. Our precision machine tools saw, plane and mill the individual parts to the correct dimensions and shapes. Before being carefully and securely packed, everything undergoes a final inspection.

In order to be able to offer our customers the best quality, we have implemented a quality management system that complies with the requirements of the ISO 9001 standard. Our products also come with a 2-year or a 5-year warranty (on all wooden parts).

DELIVERED TO YOUR DOOR

The assembly kit

Your garden cabin will be delivered as a complete kit in one or more packs. Comprehensive assembly instructions are included. If you do not begin assembly immediately after delivery, store your garden cabin in a dry location, protected from UV light.

Delivery

We deliver our products to your specialist dealer on request or “to the kerb” at your home for an additional charge. Delivery will be made on the agreed date using a 40 t HGV. There must be no restrictions to access for this vehicle.

Presenting:

THE HIGH-END PAINT SYSTEM FOR GARDEN CABINS MADE IN ESTONIA.

The environmentally friendly water-based stain is ideal for professional use outdoors and provides lasting protection for your garden cabin.

ALL CABINS IN 4 COLOURS. NO UNDERCOAT REQUIRED!

Light Grey

Carbon Grey

New - Green-grey

Swedish Red

Our 4 colours

Wooden doors, windows and cover strips are always supplied in a timeless cream white, which in combination with the main colours results in four attractive variants. In addition, we offer a water-based glaze - a reliable and long-lasting protection that is ideal for professional outdoor use. Please note that the colours shown may differ slightly from the actual finish, as printing inks affect colour reproduction and therefore slight differences may occur.

At a glance

- Garden cabin delivered as standard with a natural finish
- Environmentally friendly and low-odour treatment
- Ideal protection against weather, fungi, insect infestation, mildew and blue stain
- Paint for repairing minor damage included in delivery
- Recommended maintenance interval 5 years (depending on location, compass direction and colour), Lasita Maja warranty max. 5 years*.
- Slight colour differences are possible due to the nature of the wood.

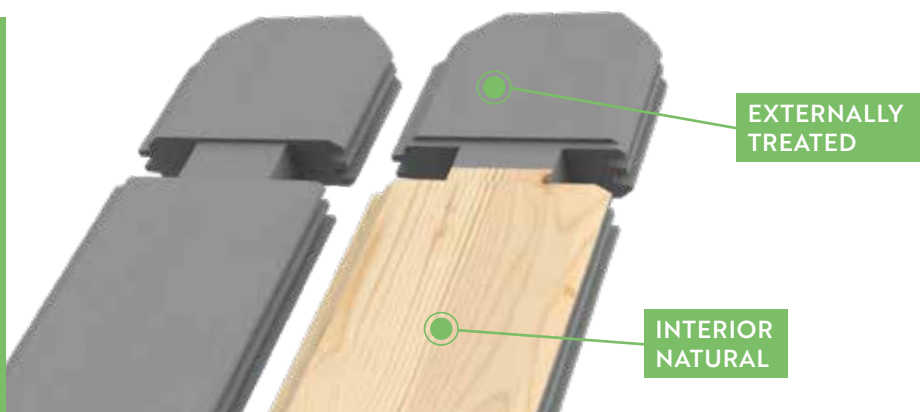

The advantages of our wood treatment

- No undercoat required.
- 3-sided colour treatment of the wall boards
- Natural finish on the interior, creating a natural feeling of wellbeing inside
- Unique six-sided colour treatment of the log corner joints and log heads
- Natural roof purlins and roof boards

*Find out more about our warranty conditions in the installation instructions or at www.lasita.com.

REVERSE INSTALLATION

Please note that reverse installation of coloured garden cabins is not possible due to the one-sided colour finish!

GARDEN CABINS. SOLID, ROBUST AND PROCESSED WITH CARE IN EVERY RESPECT.

The classic log construction method has been tried and tested for centuries and is ideally suited to wood buildings for every conceivable use – from a small tool shed to an inviting garden cabin. The range of technical specifications is correspondingly broad but they are all characterised by their extremely robust and durable construction.

Caroline without optional terrace

CAROLINE IS A GREAT CHOICE WITH OR WITHOUT A TERRACE.

Plenty of space – plenty of options. Caroline is perfect for a weekend in nature or as a home office in the garden. It has three rooms. The integrated additional level can be used for storage or as a sleeping loft; it is accessible via a ladder. Caroline has an additional single door which can be positioned as desired during assembly. This means that this garden cabin can be tailored exactly to your wishes.

ACCESSORIES

STANDARD ROOFING FELT

Suitable for short-term use or as underlay for other roof coverings such as shingles or premium roofing felt, available in classic Grey, on a 10 m² or 15 m² roll, dimensions 1 × 10 m

	ROLL 10	ROLL 15
Item number	261	262
Roof area	10 m ²	15 m ²

PREMIUM ROOFING FELT

High-quality polymer bitumen roofing felt – suitable for long-term, waterproof covering of roofs, available in 4 colours, on 15 m² roll, dimensions 1 × 15 m

	BLACK	RED	GREEN	BROWN
Item number	37449	37451	37452	37453
Roof area	15 m ²	15 m ²	15 m ²	15 m ²

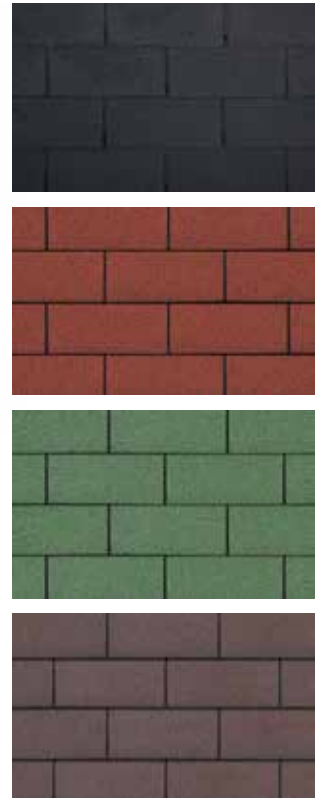

ONDULINE

ONDULINE KSK-M is a cold self-adhesive roofing membrane with an aluminium top layer and a particularly high adhesive strength. It is easy, safe and quick to apply. The aluminium top layer offers outstanding protection against UV radiation and other environmental influences. The substrate must be dry, stable, frost-free, grease-free and resistant to abrasion. Does not stick to silicone. Unevenness, holes and similar must be levelled or filled. Dimensions 500 × 100 cm

	GREY
Item number	37470
Roof area	5 m ²

ROOF SHINGLES

Three-strip roof shingles are the most widely used roof shingles. They are easy to install, guarantee a stylish, high-quality appearance and are available in the four most popular colours at 3 m² per pack.

All about the garden cabin

GOOD TO KNOW.

What should I consider before ordering a garden cabin?

The assembly of a garden cabin is usually regulated by local authority regulations. Prior to ordering, enquire about the applicable regulations from your local authority. We will be happy to provide you with the relevant technical data sheets and also have static calculations available for many models. If you need such documents, just ask us.

How will my garden cabin be delivered?

In principle, we deliver our garden cabins and kits to the respective ordering partner. On request, it is also possible to deliver the kit “free to the kerb” to your home. Please

note that the road access must be suitable for a 40 t HGV and your availability by telephone for the delivery agreement must be guaranteed. Unloading is carried out using a truck-mounted forklift. A sufficiently solid surface must be available for this.

Does my cabin need a foundation?

We recommend assembly on a firm foundation to which the garden cabin can also be attached. Ideally you should create a foundation slab. This should be slightly smaller (1-2 mm/side) than the substructure. It is important that the foundation is constructed in such a way that it will not give way due to rain, frost or snow, nor will it lift or sink.

What tools will I need for the assembly?

For correct assembly, you will need, among other things: Phillips and possibly Torx screwdriver, cordless screwdriver, wood drill, power drill, universal pliers, Stanley knife, saw, inch rule, spirit level, string, hammer, pencil, possibly glue, possibly clamps and a ladder. Whenever using tools, ladders etc., ensure safe handling and a secure footing. All the required screws and fittings are included in the kit. Assembly should be carried out by more than one person.

What must I consider before assembling my garden cabin?

Our garden cabins come with **two** sets of assembly instructions: the general instructions and the specific instructions that list the details of your purchased garden cabin. Read the assembly instructions carefully and check the kit against the parts list for completeness, damage and integrity. Please note: Garden cabins and holiday homes made from wood are natural products. Hairline cracks, gumming, knots and minor warping of the wood do not constitute grounds for complaint, as these are product-specific characteristics that do not affect the use of the product. Our log assembly kits (exception: system and panel cabins) should not be screwed tightly into the walls or at the door. The boards remain “loosely” connected and must have the opportunity for flexible movement (lifting and lowering).

How can I complain about damaged parts?

Complaints are accepted if they are made in writing within 14 days of delivery of the cabin. To do this, mark the relevant parts on the parts list and send this with the purchase receipt and assembly instructions (incl. control no.) to your dealer. They will process your complaint with us. A digital photo or presentation of the parts that you are not happy with serves as proof.

How do I ensure lasting protection of the garden cabin?

Our components are delivered in their natural state. Therefore, once assembled, you must paint the cabin, windows and doors on the interior and exterior with at least a colourless wood preservative. It is recommended that you use environmentally friendly water-based products for this and reapply the protective coating at least every two years. This will ensure that you can enjoy looking at and using your garden cabin for many years to come.

What form does the roofing of a garden cabin take?

If roof covering is included in the scope of delivery, we supply bitumen roofing felt for the initial covering. This should be renewed after approx. one year in order to maintain long-term rain protection. We also offer bitumen roof shingles in a high-quality and resilient form which protect the roof for a longer period of time. For our flat-roof models, we recommend our Onduline KSK-M roofing membrane as well as our gutter sets (see Accessories).

LASITA MAJA – Paint system

CARE INSTRUCTIONS.

For lasting enjoyment of your colour-stained log cabin, it is necessary to maintain the surface professionally on a regular basis. If you carry out this maintenance yourself, please read the general safety instructions in our assembly instructions and also the corresponding maintenance information. Should the surface incur minor damage during assembly or delivery, please use the paint supplied to repair this damage. This replacement paint is intended to repair small areas of mechanical damage or wood caps (spot repair) and not to paint large areas. Should you need paint for repainting, please contact your specialist dealer; they will be happy to help you.

It is important to clean the surface regularly. This will significantly extend the life of your product. Inspect your garden cabin every year for possible dirt, algae growth, damage, delamination or paint degradation. It is also important to keep the paint surface free of vegetation or plants. They prevent adequate ventilation and lead to moisture build-up. Pay particular attention to the sides facing the sun. These are exposed to more UV radiation and may need more attention.

MAINTENANCE / REPAINTING:

1. Clean the surfaces to be maintained with an appropriate cleaning agent.
2. Remove loose or porous layers of paint, preferably with a suitable abrasive material.
3. Apply the maintenance coat with a suitable brush. Ensure the paint is applied thickly and evenly.
4. Allow the paint to dry well (at least 48 h).
5. Apply a second coat to the renewed surface (attention, little paint absorption!), thereby protecting the surface.

If you carry out this maintenance correctly, you will enjoy your garden cabin for many years.

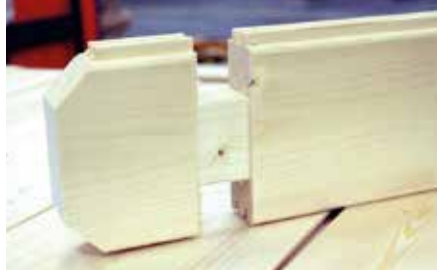

If you have any questions, please do not hesitate to contact us or your specialist dealer.

Quality features

EVERY DETAIL COUNTS.

Impregnated terrace boards

Wind-tight chalet corner connection

All end profiles included in delivery

Impregnated substructure protects the wood against moisture and extends the service life

15/18.5 mm floorboards (optionally available in 28 mm for holiday homes).

Wooden storm strips or threaded rods (depending on model) protect your garden cabin against strong winds

High-quality windows and doors

Real glass windows and doors, single glass or double glazing

1 or 2-hand tilt&turn windows (depending on model), Exception: Horizontal, fixed windows

Lockable doors, except for children's playhouses

Doors mainly with easy access

18.5 mm roof boards

Assembly instructions and accessories included

The cabins are packed very carefully for transport. UV-resistant film as well as sturdy pallets protect the garden cabins from moisture and transport damage.
